

GENERATOR BRUSHES

Don't use any 6-volt generator brushes, Part No. 30451-58, you may have in stock on the 12-volt generator. Use only new brushes, Part No. 30426-58 for this purpose. Although these two type brushes may look alike they are not. The new brushes are made of a different material designed specifically to handle the larger power capacity of the 12-volt system, but are also suitable for use on 6-volt generators.

If the old brushes are used on the 12-volt generator it will result in short brush life and possible damage to the armature commutator. Use up the old Part No. 30451-58 brushes on 6-volt generators only.
